

EquinePRP

The Healthy Path to a Swift Recovery

Release the Power of Growth Factor Healing

The EquinePRP Platelet Rich Plasma Kit is a reproducible method for preparing Platelet-Rich Fibrin Matrix (PRFM). EquinePRP maximized plasma yield, containing five times (5X) the concentration of platelets over blood alone, the optimal amount for wound healing.³ These platelets contain 7 key growth factor groups including TGF- β , VEGF, IGF I, II, ECGF, PDGF, FGF, and EGF.

- **100% autologous**
- **Easy to use**
- **Cost Effective**
- **5X the platelet concentration over whole blood**

EquinePRP Platelet Rich Plasma Kit is formed using only 9cc of the animal's blood.

- **Results in ~5 mL of pure PRP**
- **Steady release of factors over 2 week period**
- **No bovine thrombin or collagen**
